Events

A conference presented by the IBA Arbitration Committee

12-13 March 2020

Under the theme of Innovation 360: new and novel ideas for the practice of arbitration – critically tested the 2020 Arbitration Day will present a series of panels, with each panel presenting one new idea that challenges a key aspect of the way in which international arbitration is presently practiced. Each panel discussion will start with the proponents of the new idea making their case. Both the other panelists and the audience will then subject the new idea to critical testing and rigorous assessment.

Topics include:

- Procedural Timetable No. 1—topped and tailed: improved case management

- Quantum academy: training and certification on assessing damages

- Creating an independent technology and document management hub

- Prosecuting and adjudicating fraud claims in international arbitration
