

EU LAW AND LITIGATION

MULTI-SECTOR KNOWLEDGE AND IN-DEPTH UNDERSTANDING OF EU INSTITUTIONS AND LITIGATION

The EU is at the origin of an ever-increasing amount of complex regulation. EU laws are constantly evolving and must be implemented and enforced by European and national administrations, often raising challenging legal questions.

Many of our team members have over 20 years' experience in proceedings before the European Commission and the European courts and have also worked in the EU institutions (at the Commission, the Council and the Court of Justice). Collectively, the team has been involved in hundreds of cases before the European courts whether it be as claimant, defendant or judge. This makes our team one of the most skilled in Brussels – and the EU more widely – to guide clients through the EU's increasingly complex regulatory framework.

Our EU law specialists advise across a broad range of EU regulatory rules, including those pertaining to consumer goods, chemicals, food, energy, financial services, TMT, and public procurement. We guide clients in their engagement with regulators and legislators in relation to EU and national proposals, including drafting submissions in response to public consultation processes and regulatory assessments. We also assist clients in complex legislative interpretation.

We help our clients manage and shape their regulatory environment to ensure that they are well-placed to take commercial advantage of growth opportunities while complying with industry-specific regulation.
