

ASSET AND WEALTH MANAGEMENT

GENERATING EXCEPTIONAL RETURNS

Asset managers and investment funds face a changing and complex regulatory environment. Our global team is at the forefront of developments in multiple jurisdictions, advising key industry participants on their most significant projects.

To help clients achieve their objectives, our team draws on specialist practitioners spanning corporate, fund formation, litigation, tax, employment and regulation. Our market-leading team develops deep understanding of clients' businesses to provide strategic advice and insights.

At the forefront of legal developments, such as the Alternative Investment Fund Managers Directive, we are represented on policy and industry committees with regulators in many jurisdictions.

Our lawyers advise on issues as diverse as acquisitions, fund establishment and capital raisings, hedge funds, infrastructure, offshore funds, restructurings, Shari'ah compliant investments and structured products. Our team similarly brings expert insight in ESG and impact investing, helping clients tackle the dramatic shift towards sustainable investing which is reshaping wealth management.

We also advise on the corporate elements of asset management, including administrative arrangements, incentive schemes, management, outsourcing and regulation.

As a global institution with deep resources in the key finance hubs of Asia and Europe, we can support your business whether serving investors in Mumbai or Munich. When markets are unforgiving, choose a partner who leaves nothing to chance.
