

AFRICA DISPUTE RESOLUTION

ADVISING CLIENTS ON ALL ASPECTS OF INVESTMENT AND RISK
ACROSS THE CONTINENT FOR OVER 40 YEARS

Our premium Africa dispute resolution practice is serviced by lawyers across our global network, and in particular by our disputes teams in Johannesburg, Paris and London.

We have the capability and platform to assist clients on all types of dispute or contentious matter in Africa (including international commercial and investor-state arbitration, commercial litigation, tax investigations and disputes, class actions, public international law, corporate crime & investigations and ADR), as well as to provide specialist risk management expertise.

Our dispute resolution experience in Africa includes advising and representing parties to large, complex and high-value arbitrations across a range of industry sectors, including energy, natural resources, infrastructure and telecommunications. We also spend a significant amount of time behind the scenes advising clients on how to minimise their exposure to contentious risk. We have been consistently ranked in the top band for Africa-wide Dispute Resolution since this category was first introduced by Chambers Global in 2014.

Our experience has shown that a large number of disputes between foreign investors and governments in Africa can be resolved through negotiation. These discussions can be complex, requiring cultural sensitivity and local knowledge to determine which arguments carry weight, when it is time to be firm or flexible, and if and where support can be found within government.

We will put our many years' experience to work in your negotiations, developing persuasive lines of argument while preserving existing rights, and talking to officials on the ground. Should negotiation prove unsuccessful, we can then help you craft the best dispute resolution strategy, including arbitration, litigation and ADR procedures.

The experience of our French-qualified lawyers includes appearing before the local courts in a number of Francophone jurisdictions.

The combination of our full-service multi-industry expertise, deep Africa experience and know-how ensures we can provide a real value added service to our clients in Africa whatever the challenge or opportunity.
