

INSURANCE

NAVIGATING COMPLEX RISKS

With the reverberations from Covid-19 still being felt worldwide and the risks faced by organisations constantly evolving, clients have never been in more need of top-flight insurance sector support.

Our experts work with insurers, brokers and policyholders to tackle challenges head-on, combining knowledge of legal and regulatory dynamics with technology advances and the evolution of product offerings such as cyber and warranty & indemnity insurance.

We help clients assess and mitigate risk, backed by a 2,600-lawyer network spanning many of the key global insurance centres.

Our practice has a market leading reputation in complex insurance disputes – drawing on our position as one of the world’s leading litigation teams – supporting clients on a range of high-stakes claims, coverage disputes, and contentious regulatory matters.

The range of our transactional work include high-profile and complex M&A transactions, insurance business transfers, corporate restructurings, capital raisings, advisory work, policy wordings, regulatory and outsourcing matters.

Many of our team have experience in the industry and regulators, leaving us primed to share in-depth sector intelligence and guidance on policy development.
