

THE PAPERLESS WORLD

WORKING WITH YOU AND GOVERNMENT TO FORCE PAPERLESS BUSINESS SOLUTIONS.

We recognise the considerable gap between digital solutions being developed by our clients and existing legal frameworks and regulation.

We work with clients and with Government where required to eliminate that gap as far as possible through understanding your digital drivers, formulating innovative legal solutions within the current legal system and driving change to the current legal system to realise clients projects and to expand the Paperless World.

Much of the legislation and regulation applicable to our clients in this area still is predicated on paper-based communications and solutions. This tendency spans traditional legal concepts of offer and acceptance as well as in the client communications and reporting domain.

Recognising the substantial mismatch and gap between technological solutions and practices and this regulation, our Paperless World focus is to achieve bespoke solutions for our clients and to progressively change regulation based on paper-based concepts.
