

SANCTIONS

GETTING TO GRIPS WITH A MULTIDIMENSIONAL AND RAPIDLY-MOVING LANDSCAPE

The hasty implementation and ever-expanding scope of many country-specific sanctions regimes continue to raise a myriad of urgent issues for corporates and financial institutions.

This includes understanding the sanctions' jurisdictional scope and impact, including matters such as the effect of asset freezing measures, part-ownership by sanctioned persons, licensing issues, the interpretation of sectoral sanctions and the force majeure, frustration and termination issues affecting contracts with sanctioned counterparties.

We have been heavily involved in advising both financial sector and corporate clients with operations in sanctioned jurisdictions on these and related issues, and in making licence applications to relevant authorities.

Our world-class corporate crime team spans over 26 offices across the globe, advising on both the financial and trade sanctions imposed by key agencies and on sanctions compliance programmes.
