EXPERIENCE

Nick specialises in advising private and public sector clients on UK and multi-jurisdictional technology procurement, digital and business transformation, outsourcing, IT service provision, major systems implementation, communications, software development, licensing, cloud, e-commerce, cyber security, data protection, data commercialisation and complex commercial projects. Nick advises extensively on the use and adoption of technologies such as blockchain/DLT, AI, machine learning and automation. His expertise extends across multiple industry sectors.

Nick has advised:

- Ministry of Defence ("MOD") in relation to a multi-billion pound transformation of MOD's current IT systems and supplier ecosystem across the armed forces, including advising on strategy and re-procurement of all existing IT services, redesigning and restructuring its IT sourcing arrangements and ensuring that MOD is able to benefit from advances in technology. Described as one of biggest IT projects in the world.
- a major UK retail bank on its arrangements with a fintech for the development of a cloud based core-banking platform based on blockchain technology to transform its retail and business banking platform
- Google on its technical infrastructure arrangements including network acquisition, capacity and data centres as well as product launches, to support its growth and expansion across EMEA
- Banco Sabadell and TSB on TSB's exit from £2 billion long term outsourcing contract with Lloyds' and on the subsequent £450 million deal to design and build and migrate TSB to a new digital IT platform to enable TSB to operate as a digitally enabled challenger bank in the UK market (one of the largest and most complex IT projects in Europe)
- ClearBank on its establishment as the UK's fifth clearing bank and the first new clearing bank in over 250 years, transforming the digital clearing bank market with a modern, purpose built and cloud-based digital banking platform. It is the only known bank to design and build its entire digital banking platform from scratch
- Transport for London on its £660 million procurement and outsourcing of the operation of its ticketing and revenue collection systems and services across TfL's travel network, including the next generation of technology for contactless payment systems for the 9 million journeys made on London's transport network each day
