

SUSTAINABLE AND GREEN FINANCE

SUPPORTING OUR CLIENTS NAVIGATE THE WORLD OF SUSTAINABLE AND GREEN FINANCE

Interest in sustainable and green financing has accelerated dramatically in recent times. Many corporates and investors across all sectors are now utilising green debt products or thinking about doing so at the next opportunity.

In our latest annual Corporate Debt Report, nearly 50% of treasurers we surveyed are factoring in [ESG \(Environmental, Social and Governance\) issues](#) when raising debt, and 30% are reporting on ESG matters to lenders and other stakeholders. Another 29% said they considered ESG credentials when selecting which financial institutions to transact with.

From issuing bonds to fund the development of renewable energy projects to raising debt that satisfies issuers' environmental policies and investors' ESG mandates, our finance specialists have the experience to successfully support you when accessing funding options.

Clients we have supported in this growing area range from blue chip corporates and project companies to financial institutions and government departments.

RECENT EXPERIENCE

DANONE

Pioneer issue of €300 million social bonds due March 2025 (*Most innovative green bond deal of the year award, Sustainable and Responsible Capital Markets Awards 2018*)
