DELIVERING YOU INSIGHTS INTO EVOLVING GLOBAL TAX TRENDS

---

Businesses need practical, technical and workable solutions to their day-to-day corporate tax challenges to achieve the best outcomes and to stay ahead of constantly evolving legislative and regulatory requirements wherever they do business.

When focusing on complex corporate transactions, businesses need to be mindful of all relevant tax considerations and, increasingly where deals are cross-border, they need integrated domestic tax advice across multiple jurisdictions and an overarching international outlook.

Technical tax expertise from your advisers is a given. We combine it with an innovative and commercial approach and are fully embedded in our clients' corporate deal teams, from initial structuring stages through to full implementation end phases.

As tax authorities around the world continue to adopt firmer lines we also draw on our leading edge dispute resolution team to assist clients in tax disputes.

Our alliance with Australia's leading specialist tax advisory firm, [Greenwoods & Herbert Smith Freehills](#), means our offering is unique: we can provide integrated advice for ASX-listed and other businesses and investors with interests in Australia by combining our global practice with their exclusively revenue law practice.
