## **EXPERIENCE**

Toby has significant experience in:

- Project delivery - development and construction related agreements including EPC (using both FIDIC and domestic forms) and construction contracts, equipment supply contracts,

FEED/EPCM contracts, 'early contractor involvement' contracts, LTSA and O&M arrangements, alliance agreements, PPP/PFI's and other related project agreements

- Renewable energy – particularly in the wind, solar, hydro and geothermal sectors
- Power and gas - connection and transmission agreements, pipeline and gas storage projects, fuel supply arrangements and off-take arrangements (including feed in tariff schemes)

Toby's recent experience includes:

- Burgos Wind Farm (85MW), Luzon, Philippines – advising in relation to procurement process, EPC Contract (wind farm, transmission line and substation), LTSA and feed in tariff arrangements (Energy Development Corporation/First Gen)
- Geothermal plant relocation project, Negros, Philippines (Energy Development Corporation/First Gen)
- Broken Hill (50MW) and Nyngan (100MW) solar power stations in New South Wales – advising in relation to EPC Contracts, O&M arrangements and Commonwealth and State funding arrangements (AGL Energy)
- Newcastle gas storage facility, New South Wales – advising in relation to the design and construction of a 1.5 PJ LNG gas storage facility, including FEED/ECI study phase and EPC construction phase (AGL Energy)
- Rolling Stock maintenance – extension of the MainTrain maintenance facility contract with RailCorp in New South Wales (United Group)
