

CORPORATE

MAXIMISING GLOBAL OPPORTUNITIES

By aligning with their business strategies we guide some of the world's leading corporates, commercial organisations, investment banks, financial institutions, governments and public sector bodies through all stages of their corporate development across a broad range of sectors.

We understand that to deliver local and cross-border corporate transactions successfully in any economic climate, you need us to:

- **Support your commercial decisions** by investing time in understanding your objectives and working alongside you to achieve them
- **Understand the local markets in which you do business** and the differences between developing markets and developed economies and between regions to ensure consistent service delivery in markets around the world
- **Conduct due diligence** to identify risks and challenges and address them before they threaten the success of deals
- **Prioritise the big issues** and help you navigate through complex regulatory requirements
- **Execute end-to-end transaction management** for the duration of deals and support all negotiations
- **Consider potential litigation risks** and, if required, embed disputes lawyers into deal teams to stress test warranties, indemnities, liability limitations and jurisdiction clauses
- **Guide you through all communications with stakeholders**
